SPECIFICATIONS

GNSS Features	
GPS	L1C/A, L1C, L2C, L2E, L5
GLONASS	L1C/A, L1P, L2C/A, L2P, L3
BDS	B1, B2, B3
GALILEOS	E1, E5A, E5B, E5AltBOC, E6
	L5 (Just for the satellites supporting L5)
IRNSS	L5
QZSS	L1C/A, L1 SAIF, L2C, L5, LEX
	Trimble RTX ^[1]
	1Hz~50Hz
	<10s
illitialization reliability	
Decitioning Precision	
Positioning Precision	ning Horizontal: 0.25 m + 1 ppm RMS
-	
GNSS static	Vertical: 0.50 m + 1 ppm RMS Horizontal: 2.5 mm + 0.5 ppm RMS
	Vertical: 5 mm + 0.5 ppm RMS
Real-time kinematic	Vertical: 5 mm + 0.5 ppm RMS Horizontal: 8 mm + 1 ppm RMS
(Docalina < 20km)	Vartical 15 mm + 1 mm DMC
SLink (RTX) ^[2]	Horizontal: 4-10 cm Vertical: 8-20 cm
RTK XTRa (xFill)[3]	Horizontal: 5 + 10 mm/min RMS
	Vertical: 5 + 20 mm/min RMS Typically<5m 3DRMS
SBAS positioning	Typically<5m 3DRMS
	2~8s
IMU tilt compensation	Additional horizontal pole tip uncertainty ess than 8mm + 0.6 mm/° tilt down to 30°
iwo tiit arigie	0 ~60
Hardware Performance	45.0 (-)40.0 (11)
Weight	
Operating temperature	
Storage temperature	-25℃~+80℃
	100% Non-condensing
Waterproof/Dustproof	100 /0 INOII-CONGCINGING
	IP68 standard, protected from long
waterproon/Dustproon	IP68 standard, protected from long
waterproon/bustproon	IP68 standard, protected from long time immersion to depth of 1m
	IP68 standard, protected from long time immersion to depth of 1m IP68 standard, fully protected against blowing dust
Shock/Vibration	IP68 standard, protected from long time immersion to depth of 1m IP68 standard, fully protected against blowing dust Withstand 2 meters pole drop onto
Shock/Vibration	IP68 standard, protected from long time immersion to depth of 1m IP68 standard, fully protected against blowing dust Withstand 2 meters pole drop onto
Shock/Vibration	IP68 standard, protected from long time immersion to depth of 1m IP68 standard, fully protected against blowing dustWithstand 2 meters pole drop onto the cement ground naturally2W
Shock/Vibration	IP68 standard, protected from long time immersion to depth of 1m IP68 standard, fully protected against blowing dustWithstand 2 meters pole drop onto the cement ground naturally

WIFI	
Modem	
WIFI hotspot	Receiver broadcasts its hotspot form web UI
	accessing with any mobile terminals
WIFI datalink	Receiver can transmit and receive correction
	data stream via WiFi datalink

Data Storage/Transmission	
Storage	64GB SSD internal storage
	atic cycle storage (The earliest data
files will	be removed automatically while the
	memory is not enough)
	Support external USB storage
	izable sample interval is up to 50Hz
	lay mode of USB data transmission
	Supports FTP/HTTP data download
Data Format Differential dat	, , ,
	3, RTCM 3.0, RTCM 3.1, RTCM 3.2
	lata format: NMEA 0183, PJK plane
coor	dinate, Binary code, Trimble GSOF

Sensors
Electronic BubbleController software can display electronic
bubble, checking leveling status of the
carbon pole in real-time
IMU Built-in IMU module, calibration-free
and immue to magnetic interference
ThermometerBuilt-in thermometer sensor, adopting intelligent
temperature control technology, monitoring
and adjusting the receiver temperature

Network model support: VRS, FKP, MAC, fully support NTRIP protocol

User Interaction	
	Linux
	2-button and visual operation interface
Indicators	2 LED indicators, data interaction indicator
	and Bluetooth indicator
LCD	1.54-inch HD color LCD touch screen
	with resolution 240*240
Web interaction	With the access of the internal web interface
	management via WiFi or USB connection, users
	are able to monitor the receiver status and
	change the configurations freely
Voice guidance	The intelligent voice technology provides status
	and operation voice guidance, supports
	Chinese/English/Korean/Spanish
	/Portuguese/Russian/Turkish
Secondary developme	ent Provides secondary development
	package, and opens the OpenSIC observation
	data format and interaction interface definition
Cloud service	The powerful cloud platform provides online
	services like remote manage, firmware update,
	online register and etc

[1] It requires a subscription to data service.

[2] RTK XTRa also requires a subscription to the data service, and precision is dependent on GNSS satellite availability. RTK XTRa positioning ends after 5 minutes of radio downtime.

Remarks: Measurement accuracy and operation range might vary due to atmospheric conditions, signal multipath, obstructions, observation time, temperature, signal geometry and number of tracked satellites. Specifications subject to change without prior notice

INNO7

- Smart interactive RTK receiver -

FarLink Protocol >>>

INNO7 adopts an internal radio with 3W maximum transmission power to achieve the typical working range as 15km through "**Far-link**" protocol.

The transmission bandwidth becomes large, which perfectly solves the problem of large data volume of multiple constellations transmission. And the power consumption can reduce about 60% in the same amount of data transmission compare to the traditional RTK.

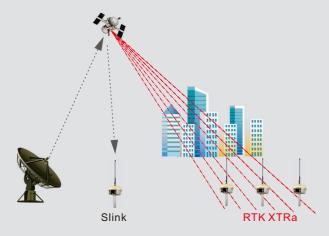

Slink & RTK XTRa ▶▶▶

Base on the RTX global services, INNO7 is able to achieve the goal of precise single-point positioning without a reference, the positioning is no more constrained by terrain environment, such as mountain, wasteland, desert, island, fixed solution is generally available as long as the GNSS constellations are visible.

Moreover, RTK XTRa technology which is derived from RTX services, it can extend RTK positioning for several minutes while the RTK primary source of correction stream is interrupted or not available, it really makes RTK bright anywhere.

64GB SSD ▶▶▶

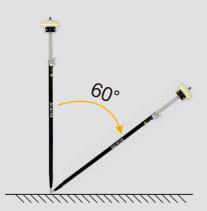

Built-in 64GB solid-state storage, which can meet most needs of measurement works. And the feature of cyclic storage helps receiver to automatically remove the previous files while there is not enough space in the memory, with this excellent performance, data storage can last almost 4 years based on 5s sampling interval. And the design of embedded memory chip can ensure the safety of measurement data.

The 'Fast' IMU ▶▶▶

INNO7 is integrated with a new generation IMU module that it only needs 2-5s of shaking receiver to complete the initialization, and the maximum tilt compensation angle can be 60 degree. it can ignore magnetic interference while RTK receiver works in such a magnetic environment. This professional IMU module can keep the tilt effect for about 40s if RTK receiver stays on a point without moving.

IMU is an electronic unit which records angular velocity and linear acceleration data which is fed into a central processing unit for data interpreting and logging. When the RTK receiver moves, and then it will record the data and send back to the receiver for calculating to output the corrected result of position.

RTK² ▶▶▶

Innovative "dual RTK engine algorithm technology" to achieve secondary coordinate check and calculation, effectively avoiding the problem of fake coordinates, more reliable coordinate accuracy and higher stability.
