Communication Range	Typically 8-10km with Farlink protocol (12-15km in optimal condition)
Bluetooth	Bluetooth 5.0, Bluetooth 3.0/4.2 standard, Bluetooth 2.1 + EDR
NFC Communication	Support
Modem	802.11 b/g/n standard
Data Storage/Tran	
Storage	16GB SSD internal storage
	Support automatic cycling storage
	Support external USB storage (OTG)
	The customizable sample interval is up to 20Hz
Data Transmission	Plug and play mode of USB data
	transmission
	Supports FTP/HTTP data download
Data Format	Static data format: STH, Rinex2.01,
	Rinex3.02, etc.
	Differential data format: RTCM 2.1, RTCM
	2.3, RTCM 3.0, RTCM 3.1, RTCM 3.2
	GPS output data format: NMEA 0183, PJK
	plane coordinate, Binary code
	Support: VRS, FKP, MAC, fully support
0	NTRIP protocol
Sensors IMU	Built-in IMU module, calibration-free, 60°
IIVIU	Front camera: 8MP (can be used in AR
Camera	stakeout)
	AR stakeout camera: 2MP
Laser	3R green laser, 30m working range
Electronic Bubble	Controller software can display electronic
	bubble, checking leveling status of the
	carbon pole in real-time
Thermometer	Built-in thermometer sensor, adopting intelligent temperature control technology, monitoring and adjusting the receiver temperature
User Interaction	
Operating System	Linux
Indicators	Satellites, data and power indicators
	With access to Web UI via WiFi or USB
Web Interaction	connection, users can monitor the receiver
	status and change the configurations
Voice Guidance	Chinese/English/Korean/Spanish/
	Portuguese/Russian/Turkish/French/
	Italian/Arabic
Secondary	Provides secondary development package,
Development	and opens the OpenSIC observation data
· · - · -	format and interaction interface definition The powerful cloud platform provides
Cloud Service	online services like remote management,
	firmware updates, online registers, etc.

*Reserve for future upgrade.

Remarks: Measurement accuracy and operation range might vary due to atmospheric conditions, signal multipath, obstructions, observation time, temperature, signal geometry and number of tracked satellites. Specifications subject to change without prior notice

SOUTH SOUTH INNO5 -- REACH NEW HEIGHT LASER RTK SOUTH LASER MEASUREMENT **REMOTE STAKEOUT** LIVE-VIEW AR STAKEOUT WITH DUAL CAMERAS

Laser Measurement

— Add Them Together to Multiply Your Power

Measure More and Further in Shorter Time

With laser measurement, INNO5 has a broader working range and fewer blind spots, enabling remote measurements in areas with poor GNSS signal quality. Previously challenging spots, like spaces under rooftops and areas with obstacles, are now easily measurable

Measure in Day or at Night All by Your Need

Laser measurement allows surveyors to collect target point at a dark environment such as night or semi-indoor environment. It also can measure distance indoor.

Measure the Unreachable Break the Limits

Laser measurement allows surveyors to collect target points at a position that traditional RTK can not reach directly, such as points on the surface of a wall, a tree, or sill of window, and the small space that surveyors cannot step in.

Keep Away from Dangers Safe than Ever

Laser Measurement helps users mitigate risks when surveying near hazardous areas, such as busy roads and seas or lakes, ensuring surveyors' safety. A secure working approach is not only a personal requirement but also essential for the well-being of your family.

Laser Stakeout & CAD AR Stakeout

— Lift Your Efficiency to A New Level

LASER STAKEOUT

To Overcome the Difficulty

Lasers bring more possibilities to staking out.

Now, when you encounter tall obstructions near the target point in the field that block satellite signals, you will no longer be helpless.

Please just enable laser and continue the work.

Additionally, when it is inconvenient to carry instruments to the target point, you can also choose to stake out by laser from a distance of several meters away

Simplify Your Workflow with CAD

INNO5 can integrate the content of CAD drawings with real-world scenes, helping you stakeout targets more quickly.

The front camera assists surveyors in finding a general direction from a distance and understanding the distribution of surrounding features. The bottom camera enables precise stakeout as you approach the target.

With dual camera's help, your stakeout will be easier and more intuitive.
