Iconic User Interface

The Survstar onboard program features an iconic display of the survey elements, like electronic bubble, e-compass, star key and iconic toolbar. It provides a better understanding for station setup, data collect, stake out in daily tasks.

Map-Driven Workflow

Map is an interactive display feature embedded in Survstar. It offers a graphical display of the survey elements with base map, which can be downloaded by network, or imported by manual.

It provides a better understanding for data collect, stake out in daily tasks.

Powerful Onboard Program

Including Free Station, COGO, CAD Stake Out, Arc Stake Out, Reference Line, Traverse, etc.
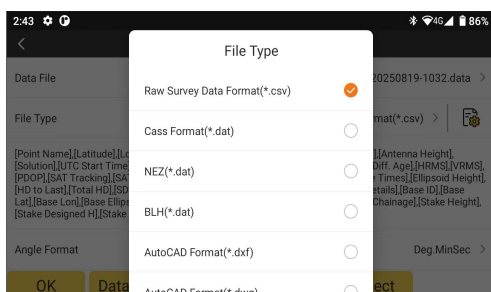

CAD Stake Out

With CAD Stake Out, N1 helps to handle the data and stake out freely in DWG or DXF files. The only thing you need to do is import the CAD files to your N1 total station.

Traverse

When you've got a very difficult site with a lot of obstructions like trees, that obscures our visibility; Or when you can't measure or place the points you need, traverse on N1 total station helps to get a few more control points to work further than the first orientation.

Flexible Data Manage

You can send or receive your data to your controller or PC more flexible than ever, by multiple data format, e.g. *.txt, *.dxf, *.dat, *.csv, *xls.

When you've got a N1 total station, you will have infinite possibilities.
